Evidence Based Interventions

Those of Interest to Primary Care are:
Minimally Symptomatic Inguinal Hernia

Exercise ECG

Gastroscopy

Imaging for Low Back Pain – MRI

Imaging for Knee, Hip and Shoulder – Plain Xray only

PSA with symptoms only unless family history or racial risk

LFT's with lipid lowering drugs at 3 and 12 months only

Get Fit First

- Aim: To encourage those waiting for surgery to lose weight and stop smoking.

Get Fit First

- Aim: To encourage those waiting for surgery to lose weight and stop smoking.
- Increasingly successful before Covid but now more difficult to apply with longer waiting lists.

Get Fit First

Aim: To encourage those waiting for surgery to lose weight and stop smoking.

Increasingly successful before Covid but now more difficult to apply with longer waiting lists.

GPs can now refer to GFF at the time of referral.
