 - Extended hours
- Motivating
 - Self-management

Let's keep Listening

- Steering group
 - G.P, Patient, Voluntary Sector
- Patient Group
- Individual Practice Support
 - Advice and guidance

GFF & Clinical Thresholds

Patients will only be referred to secondary care once they meet both the Get Fit First Policy and any other commissioning policy outlining the relationship with Clinical Thresholds.

Supporting Patient Expectation

1. Does the patient have a BMI of 30 or above?	YES	NO
2. Is the patient an active smoker?	YES	NO
3. Is the referral subject to clinical thresholds?	YES	NO

If **NO** to all questions then complete the Get Fit First in Barnsley Referral to certify health improvement period is not required.

If **YES** to Q1 and/or Q2 then patient is subject to the health improvement period (check exemptions).

Complete the Get Fit First in Barnsley Referral to evidence the patient meets the criteria.

If also **YES** to Q3 then the patient should be reviewed against the checklist criteria and managed conservatively during the health improvement period. The patient should only be referred if they meet the threshold.

Triage

Dr Santiago-Martin
