

Update of shared care

Karen Bruce

Rheumatology Nurse Practitioner

Barnsley Hospital NHSFT

Objectives of session

- Secondary care team responsibilities.
- Primary care responsibilities.
- Patient responsibilities.
- Discussion on sub cut Methotrexate.

Secondary care

- Diagnosis and commencement of DMARD.
- Education of patients re disease process and early monitoring of DMARD.
- Ensure patient stable with both disease and DMARD.
- Send shared care agreement with cover letter stating dose of DMARD and patient stability at time of request.
- Communication to be updated at each visit if dose has been altered giving reason why.
- Availability of medical staff for advice.

Primary care responsibilities

- Reply to request of shared care within 2 weeks of receiving shared care form.
- If not happy to do shared care on a particular patient to give reason why.
- That patient clear what is being monitored and by whom, also how the process is done in your surgery.
- Monitor bloods and prescribe DMARD. Monitoring book to be filled in if required.
- Report back to secondary care if monitoring not in line with protocol or monitoring boundaries of that patient.
- Report back to secondary care if disease no longer stable.

If blood results out of range:-

- phone (often on answerphone)- see attached sheet
- fax a letter, if preferred or if no reply on the phone
- If in doubt, stop DMARD while awaiting a reply.

Patients responsibilities

- Discussion with secondary care and GP to see how process happens before running out of medication.
- Keep close eye on how much medication is left do not leave it too late.
- Keep monitoring book safe and filled in where it is required.
- Make sure you book in to get bloods done in enough time to get your medication.
- Participate in the monitoring of therapy and assessment outcomes, to assist health care professionals to provide safe, appropriate treatment.
- TAKE RESPONSIBILITY OF YOUR OWN CARE.

Sub cut Methotrexate

- DISCUSSION

Sub cut Methotrexate patient problems

- Cytotoxic waste bins.
- Can not get prescriptions.
- Payment of cytotoxic bins.
- Size of cytotoxic bins.

Current DMARDS

- Methotrexate
- Sulfasalazine EC
- Hydroxychloroquine
- Leflunomide
- Azathioprine
- Mycophenolate mofetil
- Gold IM
- Penicillamine

- Apremilast

Current biological agents

- Adalimumab
- Etanercept/biosimilar
- Infliximab/biosimilar
- Golimumab
- Certolizumab
- Rituximab
- Abatacept
- Tocilizumab
- Secukinumab
- Ustekinumab

- Please remember to include a warning in your prescription settings for biologicals or DMARDs prescribed at hospital.
- Please remember to include these drugs in correspondence, particularly acute admission notes to hospital.

Thank you

Emis web users

Do you know how to add a hospital ONLY prescribed drug on to your system?

A. Yes

B. No

Select correct drug, form and strength from picking list either by double clicking it or highlighting correct drug and pressing enter. (NOTE- for methotrexate a dosing box will appear with pre-set doses and quantities. For hospital issued methotrexate only press cancel and follow procedure below).

In the directions box type e.g. 'DISPENSED BY THE HOSPITAL ONLY. See latest ***** clinic letter for current dose'.

In the quantity box type '0' (zero). If prompted to add number of 'authorised issues' enter 0 (zero). Select 'Repeat medication' in drop down list

If the medication is 'issued' in error, EMIS Web will show a pop up screen message to notify you

System One users

Do you know how to add a hospital ONLY prescribed drug on to your system?

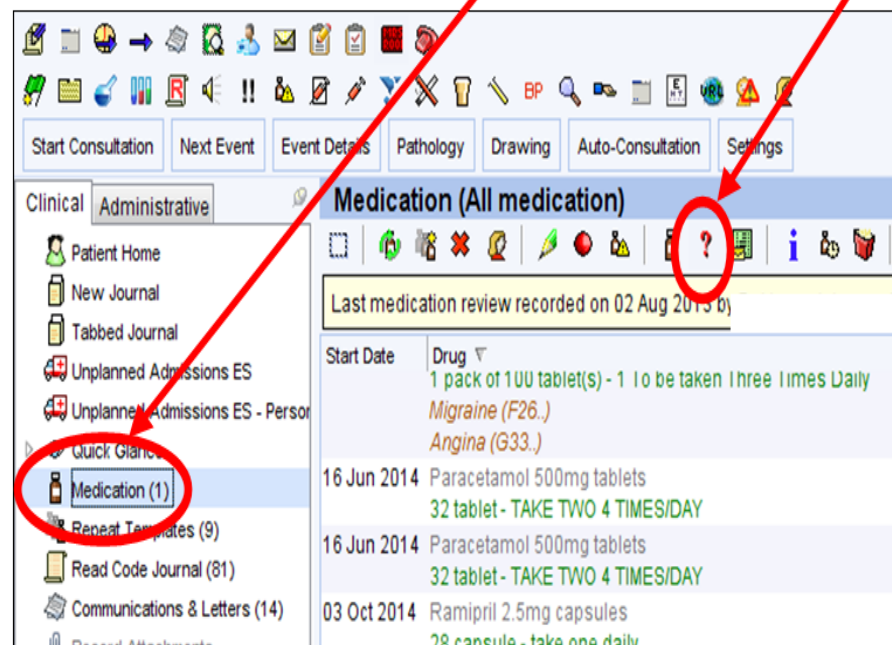

A. Yes

B. No

Select the patient and then from the clinical tree on the left hand side of the screen:

- Right click on 'medication' & select 'record other medication' or left click on 'medication & select' on the top tool bar

- The drug & appliance browser will open, search for the name of the drug you want to add and it from the list, then click 'ok'
- The 'record other medication' screen will open

- The drug & appliance browser will open, search for the name of the drug you want to add it from the list, then click 'ok'
- The 'record other medication' screen will open

The screenshot shows a 'Record Other Medication' dialog box with the following fields and annotations:

- Other Details:** A dropdown menu is set to 'Exact date', and the date is 'Wed 03 Aug 2016'. A red arrow points to the dropdown, and another red arrow points to the date field.
- Problem:** A text box contains '[X]Dementia in Alzheimer's disease (Eu00.)'. A red arrow points to the 'X' icon.
- Warning:** A yellow banner states: 'Changing the consultation date will affect all other data entered. To avoid this, cancel and press the 'Next' button'. A 'Hide Warning' link is on the right.
- Start date:** A dropdown menu is set to '03 Aug 2016'. A red arrow points to the dropdown.
- End date:** An empty dropdown menu.
- Medication source:** Three radio buttons are present: 'Other Medication', 'Dental Medication', and 'Hospital Medication'. The 'Hospital Medication' option is selected. A red arrow points to the selected option.
- Drug:** A text box contains 'Donepezil 10mg tablets' with icons for a bottle, information, and a pill. A red arrow points to the text.
- Dose:** A text box contains 'Dispensed by hospital only. See lates'. A red arrow points to the text.
- Quantity:** A text box contains '0'. A red arrow points to the text.
- Script notes:** An empty text box.
- Administrative notes:** A text box contains 'Memory clinic at Barnsley Hospital'. A red arrow points to the text.
- Buttons:** 'Ok', 'Ok & Another', and 'Cancel' buttons are at the bottom.

- Change 'exact date & time' to 'exact date' and enter the appropriate date
- Link the medication to an existing problem or create a new problem
- The start date will automatically populate & can be altered. Do not enter a stop

- The hospital drug is now shown in the medication list and also shown in the 'other medication' section of the repeat medication list.

The screenshot displays a medical software interface with a sidebar on the left and a main content area. The sidebar includes options like 'Patient Home', 'Quick Glance', 'HBP Consultation View', 'Appointments, Visits & Tasks', 'Major Active Problems (7)', 'Minor Active Problems (1)', 'Inactive Problems (1)', 'Sensitivities & Allergies (2)', 'Medication (1)', 'Repeat Templates (4)', 'Communications & Letters (31)', 'New Journal', 'Tabbed Journal', 'Pathology & Radiology', 'Pathology Requests', 'Misc. Flags (9)', 'Goals', 'Numeric Results', and 'Recalls (6)'. The main content area is titled 'Repeat Templates' and shows a table of medication entries. A red arrow points from the text above to the 'Aspirin 75mg dispersible tablets' entry. Below this, there is a section titled 'Other Medication' which is circled in red. This section contains an entry for 'Donepezil 10mg tablets'.

Authorised	Drug	Last Issued	Review	Issues	Flags
24 Jun 2013	Hydrocortisone 1% cream 15 grams - Apply thinly to the affected area/s twice daily	16 Dec 2013	24 Jun 2014	2 (2)	[Icons]
04 Oct 2012	Aspirin 75mg dispersible tablets 56 tablet - take one daily <i>Additional Script Notes: TO TAKE AN APPOINTMENT FOR A BP CHECK.</i>	24 Jul 2013	04 Oct 2013	2 (2)	[Icons]
05 Jul 2012	Aspirin 75mg dispersible tablets 28 tablet - take one daily	30 Jun 2016	05 Jul 2013	5 (5)	[Icons]
02 May 2013	Amlodipine 5mg tablets 28 tablet - take two daily	19 Jul 2016	02 May 2014	10 (10)	[Icons]

4 Repeat templates

Start Date	Drug	Scheduled E...	Da...	Flags
03 Aug 2016	Donepezil 10mg tablets 0 - Dispensed by hospital only. See latest *** clinic letter for current dose. <i>Administrative Notes: Memory clinic at Barnsley Hospital</i>			[Icons]

- However any medication which has been entered with an end date will not appear on screen or on referral letters, once that end date has passed

If you need to end the medication:

- right click on the hospital drug and select  Stop Medication when prompted specify the reason and click 'ok'

If you take over the issuing of the medication:

- right click on the hospital drug and select  Make Repeat . Amend dosing, directions & total quantity. Add comments e.g. 'Shared care drug' to administration notes section. Then stop the hospital drug still listed in the 'other medication' section of the screen, following directions above.
