Can Manage!

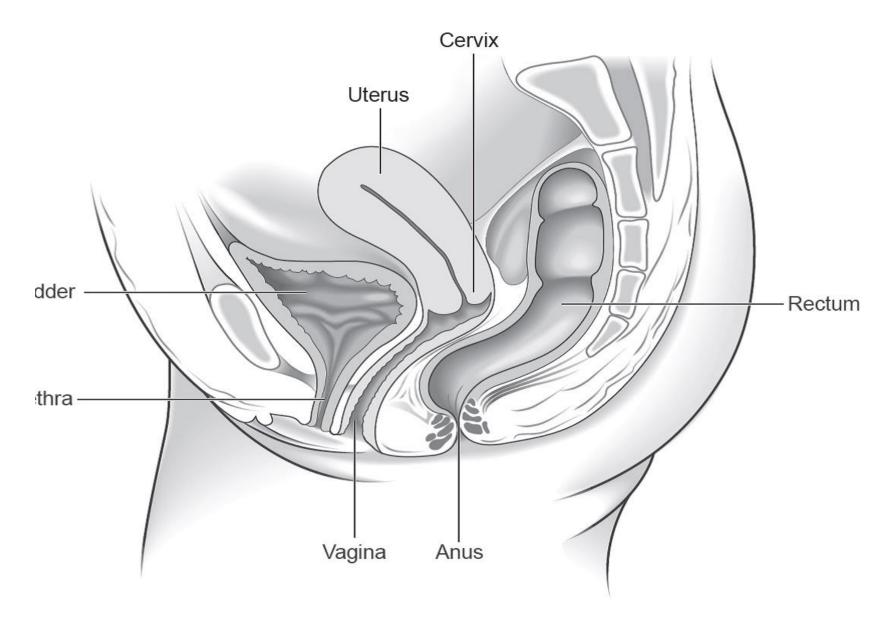

Too Much To Carry!

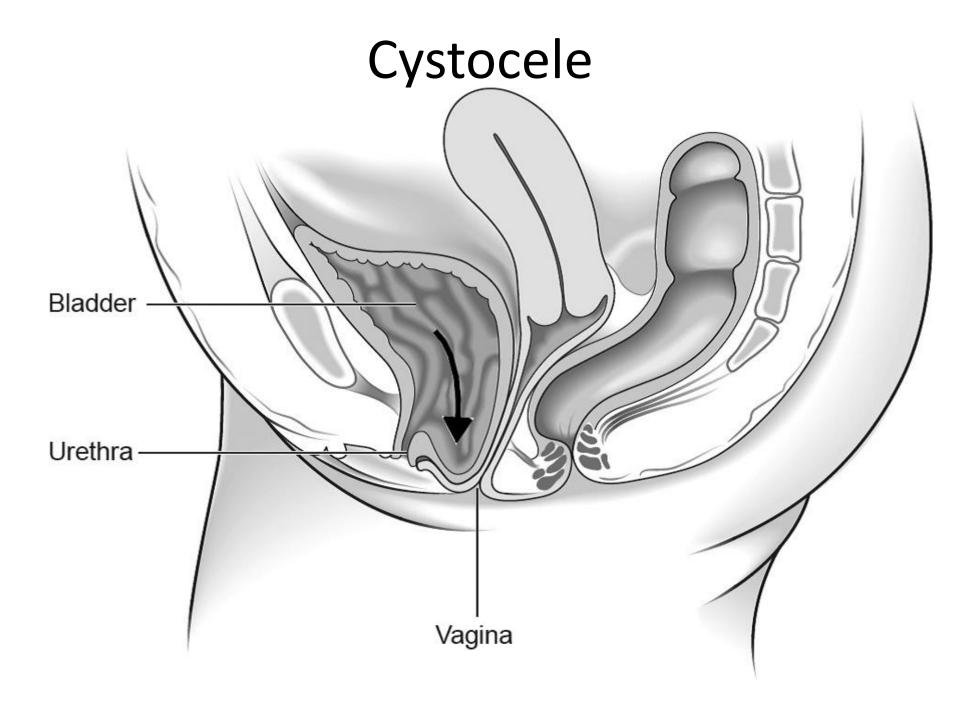

How to define 1 - Vaginal

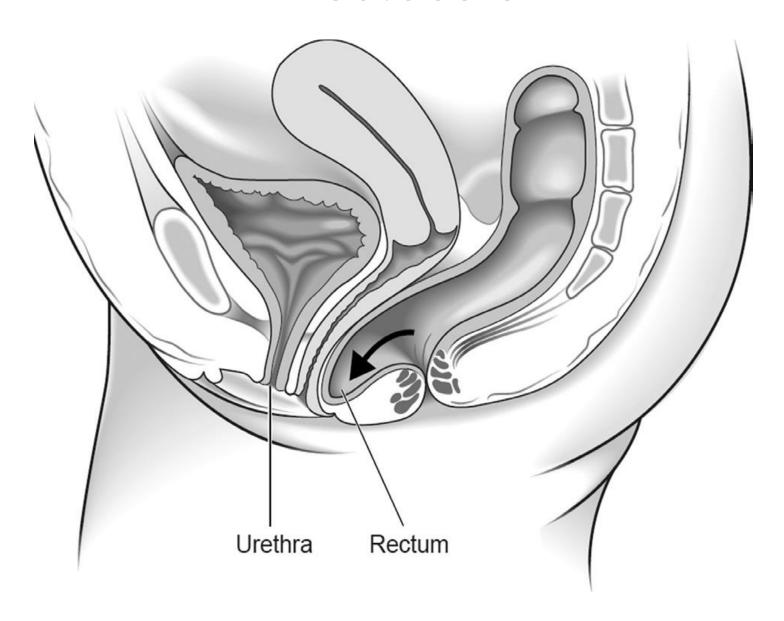

- Anterior vaginal wall
- Posterior vaginal wall
- vault

ANATOMY

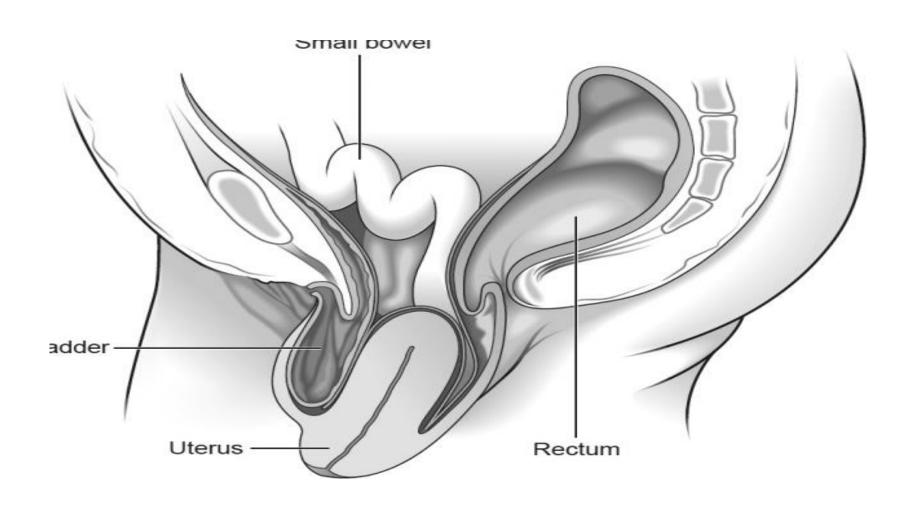

Rectocele

How To define - Uterine

- Denominator.....
- first degree
- 2nd
- 3rd or

Uterine Prolapse

How to define 2

- Descriptive
- POP Q SCORE / ICS
- Vault prolapse
- Uterine prolapse

What to look out for in the history?

- · 'something coming down'
- Perineal discomfort
- Dragging sensation
- diurnal variation
- Faecal symptoms
- Voiding difficulties

Importance - surgeons

- Sexual intercourse history
 - Related to surgery / litigation
- Atrophy
- Libido etc
- partner

How to examine

- Left lateral
- Lithotomy
- Standing
- Pelvic examination Mass (1 in 150)

Management 1

- Prevention
 - Primary / Vault/ STH -NO! No!
- · Conservative

- Diagnostic value
- practicalities
- Younger patients
- Sexual function

- Life style
- · losing weight/chronic cough/stopping smoking
- { {avoiding constipation/{avoiding heavy lifting
- { {avoiding physical activity such as trampolining or high-impact exercise
- Pelvic Floor Exercise
- Local Oestrogen

Shared Decision Making

- What are my Options ?
- What are the pros & cons of each option for ME
- Where can I get support to make a decision (RCOG website)

Management 2

- Surgery 30 % recurrence
 - Vaginal repair / Pelvic Floor Repair
 - Vaginal hysterectomy
 - Sacro-spinous fixation
 - Sacro-colpopexy

Grafts

- Mesh
- Pelvicol

Some concerns

- Structure does not = function
- Latent stress incontinence
- Defining a cure
- · QoL questionnaire very important

Cases 1

- 83 year old woman with prolapse / medically unfit
- Pessaries (downside)
- Devices?
- Surgery
