

Digital Nurse Network

NHS England and the Primary Care Digital Transformation team have started a **Digital Nurse Network**. The network aims to bring together nurses from around the country who want to learn more about digital. The network will offer training, briefings, webinars and more with a focus on digital and technology.

“Nurses are a **driving force for change** within general practice and the wider NHS world. We need to be **empowered by digital** and help ourselves to work in new and innovative ways, thus improving patient care.

You don't need any prior knowledge or skills to join the network and it would be great if other healthcare professionals would join us too.

Remember, our patients trust us as a profession more than any other in the UK.”

Clinical Nurse Advisor | Ann Gregory | NHS England and the Primary Care Digital Transformation Team
