# BMJ Learning Modules

There are 700 useful BMJ E-learning modules that have been selected specifically for the BEST website

You can access the BMJ learning modules via ==education and events== on the BEST website.

You can select ==BMJ learning== from the blue box on the left or number 3 under the education and events text on the page

When you select BMJ learning you will see the courses are categorised by clinical support area like other areas of the BEST website. If you know the area you are looking for you can select it from the menu on the left

When you have selected the module you would like to undertake from the list, you will see this screen, click the blue access the module box

This will now take you to BMJ Learning and you will see the module you have selected on screen. Select start module

You will be asked to enter your email address, if you already have an account with BMJ Learning it will recognise your email address when you enter it and press continue

If you have an account enter your password and click sign in . (if you do not have a BMJ account, see the final page of this document on where to insert the access code 5927511916)

When should you refer a patient for suspected cancer?

Our quick tips module will help you get to grips with the new 2015 referral criteria published by NICE. In the module, Dr Willie Hamilton, GP clinical lead on the NICE guideline, summarises the key practice-changing points for GPs. He tells you which important new groups of patients now qualify for a two-week referral and explains the new role of direct access testing in primary care.

You can also download printable quick reference tables that summarise all the symptom-based referral criteria for adults, as well as graphic summaries of the guideline for adults and children.

Most popular
Abdominal pain in children
Reducing the risk of hyponatraemia when administering intravenous fluids to children
Motivational interviewing in brief consultations
Confidentiality

New modules
Diagnosing and managing atrial fibrillation in primary care
Acute coronary syndromes
Easily missed: Acute Achilles tendon rupture
Wrist examination
10 minute consultation - Double vision

Updated modules
Maintaining patients on oral anticoagulants: how to do it
Anaemia in old age: common presentations
Community acquired pneumonia: diagnosis and management
Chronic obstructive pulmonary disease: long term management
Starting patients on anticoagulants in secondary care: how to do it

When you return to the BEST website you will see your module is still open ready.
Click on the ==access the module== button

This will bring you to the BMJ screen and the module will now start when you click ==start module==.

You can now work through the BMJ module following the on screen instructions

10 minute consultation - a feeling of a lump in the throat

Learning outcomes

After completing this module, you should know:

- The typical presenting symptoms of globus pharyngeus and how to distinguish the condition from true dysphagia
- The red flags that should prompt an urgent referral to exclude malignancy in a patient who presents with the sensation of a lump in the throat
- The underlying physical causes that can lead to symptoms of globus pharyngeus
- The appropriate initial primary care management for a patient with globus pharyngeus.

About the authors

N Foden is a registrar in otolaryngology at the Royal National Throat Nose and Ear Hospital, London, UK.

M Ellis is a registrar in otolaryngology at the Royal National Throat Nose and Ear Hospital, London, UK.

K Shepherd is a general practitioner at the Manor Health Centre, Wirral.

T Joseph is a consultant in otolaryngology at the Royal National Throat Nose and Ear Hospital, London, UK.

How to complete this activity

Each module has:
- a learning outcome
- peer review
- time needed to complete the module

Once the module has been completed, you can retrun to the BEST page and press ADD to my CPD to record your reflection and learning for future reference and / or for your appraisal.

30 minutes

Learn how to conclude a consultation, how to anticipate the unexpected, and how to communicate uncertainty to patients.

Alcohol and substance misuse among doctors - with Dr Clare Gerada

30 minutes

Discusses factors leading to substance misuse, treatments, and the role of colleagues and organizations in supporting doctors.

An introduction to genomics

1 hour

Learn how genomic information can be use to make a more accurate or specific diagnosis of disease, individualise treatment, and predict the effects of drugs. With multimedia video.

The "general" box will contain e-learning modules related to Time Management, consultation skills, appraisal, PDP, Audits, SEAs confidentiality etc.

The modules are a mix of interactive case studies, podcasts, reading material followed by Q&A, videos, picture tests, NICE Guidance summaries and more.

If you do not have BMJ membership, then you can still access the e-learning modules, however you will need to insert the BMJ access code 5927511916 as shown on the next page.

If you are have queries re BMJ moduels feel free to contact Dr Atcha on sabiha.atcha@nhs.net , leaving a telephone number and a suitable time to contact you.

If you are having queries about access to the modules or the website in general, please contact Michelle Thompson on 01226 433674 or michelle.thompson26@nhs.net .
