Represent Support Lead

PSNC is working to provide as much information and as many resources as possible to help community pharmacy teams to understand the details of the new Community Pharmacy Contractual Framework (CPCF) agreement as they are finalised in the ongoing negotiations.

Register your pharmacy to Provide the Community Pharmacy Consultation Service

The NHS Community Pharmacist Consultation Service (CPCS) will commence on **29th October 2019**

Pharmacy contractors can now register to provide the service via the [NHSBSA Manage Your Service \(MYS\) portal](#). This includes claiming the Transition payment supplement, which will be **£900 for those who claim by 1st December 2019**.

Click here to find out how to [register for MYS](#)

NOTE- After 1st December 2019, the Transition payment supplement falls to £600 and contractors can claim this if they register to provide the service by 15th January 2020.

After 15th January 2020 **no** Transition payment supplement will be paid to contractors registering to provide the service.

When can my child return to school?

Chicken Pox 3 days from onset of rash and all blisters have crusted over	Conjunctivitis No need to stop off, but school may advise child to be absent	Diarrhoea & Vomiting All hours from the last symptoms	Giardiasis / Fever No work or school off, but school may advise child to be absent	Flu When recovered
Hand, Foot & Mouth No need to stop off, but school may advise child to be absent	Head Lice No need to stop off, but school may advise child to be absent	Impetigo When sores are no longer oozing or crusting and healed	Measles or Scarlatina / Rubella 5 days from onset of symptoms	Strep 5 days from onset of symptoms
Scarlet Fever 24 hours after starting antibiotics	Strep Throat No need to stop off, but school may advise child to be absent	Throat Swellings No need to stop off, but school may advise child to be absent	Tuberculosis No need to stop off, but school may advise child to be absent	Whooping Cough 48 hours after starting antibiotics

Hand washing is one of the most important ways of controlling the spread of infections, especially those that cause diarrhoea and vomiting and respiratory disease. Liquid soap, warm water and paper towels are recommended. Supported by the Barnsley Health Protection Board. This information was correct at time of printing (August 2019). This information is based on health protection guidance from Public Health England on managing cases of infectious diseases in schools and other childcare settings. More information can be found at [www.gov.uk/government/uploads/system/uploads/attachment_data/file/411116/childcare.pdf](#)

It can be confusing deciding when to allow a child back to school after an illness. This handy guide has been developed to help schools and parents make the right decision to help reduce the spread of common childhood illnesses.

Hand washing is one of the most important ways of controlling the spread of infections, especially those that cause diarrhoea and vomiting and respiratory disease. Liquid soap, warm water and paper towels are recommended.

Supported by the Barnsley Health Protection Board. This information was correct at time of printing (August 2019). This information is based on health protection guidance from Public Health England on managing cases of infectious diseases in schools and other childcare settings.

- Transfer of Care Around Medicines
- Those most at risk of medication errors may not be highlighted to Community Pharmacy e.g. those recently discharged from hospital.

Referral Received

Referrals appear at the top of the Services page.

Click on the referral to accept.

You will need to know your account password to open the referral.

The screenshot shows a web application interface. At the top is a navigation bar with tabs for Services, Assessments, Reports, Claims, Admin, and Help. The 'Services' tab is active. On the left is a sidebar with a 'Services' section and a list of items including 'Consumption' and 'Routine Replacement after Stage 2'. The main content area features a 'Provision List Options' section with a checkbox for 'Show patient identifiable details'. Below this is a table of 'Received Referrals' with columns for 'Received Referrals', 'Service (stage)', 'Identifiers', 'User', and 'Status'. A single row is visible with the following data: '2019-04-30', 'Pharmacy Follow-up - Barnsley Hospital', 'DX', 'manager', and 'Pending Referral Accepted'. At the bottom of the main content area is a 'Recent Provisions' section with a search box labeled 'Search for Identifier:' and a magnifying glass icon.

Received Referrals	Service (stage)	Identifiers	User	Status
2019-04-30	Pharmacy Follow-up - Barnsley Hospital	DX	manager	Pending Referral Accepted

Enrolment

Enrolment is required by each pharmacist providing the service.

If new to the service type in New Practitioner and click the Enrol Me button.

Complete Enrolment Criteria and Click Enrol button.

Pharmacy Follow-up - Barnsley Hospital

Enrolment Requirements

The commissioner requires that the individual delivering this service meets certain criteria. Enter either your **name** or **registration number** in the box below and select from the list that appears.

Practitioner Name

To enrol to provide the service,
simply click the button next to the box above

Enrolment Criteria

Your Full Name
This should be your full name

Registration
Your registration with your regulatory body

The referral you have received allows you to send a letter to the patient's GP if they have suffered an adverse reaction. The notes field will be passed to the GP so you should **always** ensure that details of the drug and the reaction are there. It would also be **good practice** to provide an alternative suggestion to the GP if one is suitable and available.

Referral Notes Yes No
Select Yes if you have made note of the comments above

 Needs to be 'Yes' to meet the requirements

Enrol

Referral

Before proceeding the pharmacy should confirm that the patient is known to them.

Tick ALL that apply, If Other please specify

Medicines Reconciliation

Medication reconciliation is the process of creating the most accurate list possible of all medications a patient is taking - including **drug name, dosage and frequency**, and comparing that list against the discharge information with the aim of providing correct medications to the patient at all transition points.

Implementation Plan:

Letter out to Pharmacies giving notice August 19

Followed by:-

- Resource Pack

- PharmOutcomes Platform changes

- PharmacyFirst Scheme resources “call back “ –
quarantine and new materials circulated

Conditions

- Allergies
- Earache
- Eczema
- Scabies
- Vaginal thrush
- Head lice (From July 2019 will provide enhanced guidance and support and will only be able to supply the Nitty Gritty combs or Bug Buster Kits for the treatment of head lice.)

Your pharmacy team can also offer you additional advice, guidance and support personal to you for a whole range of common, minor health concerns for which you can buy treatments over the counter.

They have a private consultation area available where they will discuss your symptoms and they can offer practical advice personalised to you.

A list of pharmacies involved in the scheme is available on the Barnsley CCG website. Search for *Pharmacyfirst*.

PRESCRIBING OF OVER THE COUNTER MEDICINES IS CHANGING

The NHS spends around **£569 million** each year on a wide range of medicines which can be purchased from local pharmacies, supermarkets and other retail outlets.

In 2018, NHS England issued national guidance on over the counter products which should **NOT** generally be prescribed to ensure long-term sustainability of the NHS. This guidance encourages people to self-care for minor self treatable and/or self-limiting conditions which will get better with time.

Your doctor, nurse or pharmacist will no longer generally prescribe medicines that are available to buy over the counter

DID YOU KNOW?

The cost to the NHS for many of these medicines is often much higher than the price for which they can be purchased over the counter and you can get them without seeing your doctor.

For further information see our leaflet or visit the NHS website www.nhs.uk/OTCmedicines

Barnsley Self-Care Guidance

Guidance on conditions for which over the counter items should not routinely be prescribed in primary care

The full NHS England guidance is available at: <https://www.england.nhs.uk/wp-content/uploads/2018/03/otc-guidance-for-ccgs.pdf>

Barnsley CCG has made the decision to adopt all of the recommendations within the NHSE guidance. This document has been produced to support primary care clinicians with implementation of the recommendations in practice. ~~It can also be used by community pharmacists to help provide information to the patient on self-care for each condition and to help signpost the patient to the right service.~~

The guidance is intended to encourage people to self-care for minor illnesses as the first stage of treatment. It is envisioned that in most cases (unless specified) these minor conditions will clear up with appropriate self-care. If symptoms are not improving or responding to treatment, then patients should be encouraged to seek further advice.

The guidance is not intended to discourage patients from going to the GP when it is appropriate to do so.

This guidance applies to all patients, including those who would be exempt from paying prescription charges, unless they fall under the exceptions outlined below (general exceptions) or within the table below under each condition/item.

GPs and/or pharmacists should refer patients to NHS UK, the Self Care Forum or NHS 111 for further advice on when they should seek GP Care.

Welcome to NRLS Reporting

The National Reporting and Learning System (NRLS) is a central database of patient safety incident reports. Since the NRLS was set up in 2003, the culture of reporting incidents to improve safety in healthcare has developed substantially.

All information submitted is analysed to identify hazards, risks and opportunities to continuously improve the safety of patient care. Please [click here](#) for further information.

The published Organisation Patient Safety Incident Reports are generated by the Explorer Tool and can be found [here](#).

For the published data workbook, please [click here](#).

For the monthly published data reports [click here](#) and for the National Patient Safety Reports [click here](#).

After logging in you can:

- Upload incident reports from your local risk management reporting system
- Review incident reports submitted by your organisation
- View incident reports submitted online to the NRLS for your organisation
